

# Family Needs Vary Greatly

We live in a world where change is a normal part of our experience. In the past, families had access to medical and dental plans through their employers. In many cases, employers have reduced the benefits offered to employees. Our practices are sensitive to the ever changing needs of our patients.

Family needs vary greatly. Some families have access to employer dental plans. Other families may make arrangements through various other dental plans. Many families, including self-employed persons, do not have access to dental insurance. Cost of health care may pose a concern to many of these families.

*We are here to help.*

## 20 % Discount for Other Dentistry

*Our dental plan is designed for health conscious individuals and families who want access to affordable dental care.*

**Our practices** believe strongly that the best way to reduce overall costs in the dental care is to engage in a regular and ongoing program of dental hygiene. If the dentist never has to touch the tooth with a drill, the tooth will likely last the entire life of the individual. The cost of maintaining a sound tooth is far less than the cost for restoration.

The Healthy Smiles Dental Plan is designed for health conscious individuals and families who may not have access to affordable dental care. Patients who have used the Healthy Smiles Dental Plan are more likely to keep up on their regularly scheduled visits because cost is minimal for each visit.

***Our practices are pleased to provide this plan for dental care as a commitment to the dental health of each and every patient. Having and maintaining completely satisfied patients is our greatest desire.***

### **Note:**

Annual Membership includes all fees for examinations, x-rays and supplies. Hygiene maintenance includes two visits per patient in each 12 month period. All of this is included with the small patient co-pay each visit. All other restorative, preventative, and/or cosmetic procedures performed by the doctor will be provided at the discounted rate.
